

# MAZDA PRODUCES ONE MILLIONTH MAZDA6

Published on *03/17/2006*

Mazda Motor Corporation has announced that total global production of the MAZDA6 (known as Atenza in Japan) reached the one million-unit mark in late February 2006. It took four years and one month to reach this important milestone since the first MAZDA6 came off the line at the Hofu No. 2 Plant in February 2002. This is the fastest time ever to reach one million units of production for a single Mazda vehicle model.
